

Assignment - 2

- ❖ Blanks in the age column was filled with Median value of 45. Because Mean Value is 47.2 so median was used.
- ❖ Blanks in the work class was filled with Mode of the Column that is Private. Mean was not used as of data's non numerical characteristics and the mode has higher probability.
- ❖ Blanks in native country was filled with respective Mode of the Column and average capital gain that is United States.
- ❖ Standard deviation of age is 12.56, the value is considered low and spread of data is small.
- ❖ Standard deviation of Capital Loss is 449.8781379, as the SD value is high spread of the data
