

Assignment on measures of Central Tendency and Dispersion

Refer to the excel sheet which contains the data on the income of people. You will observe that there are some missing values in most of the columns.

Decide whether you will fill these missing values with **mean, median or mode** and state the reason behind your choice.

Also, find the standard deviation for the age and the capital loss given in the data set and write your conclusion as to what these values tell us about the spread of the data for each of these.

Write your answers in a word doc and fill in the missing values in the excel sheet. Convert the doc file into a PDF file. Submit the filled in excel sheet and the PDF file in a zip file and submit it in Paatshala. The name of the folder should be your name.
